CYBEX has received more than 250 awards for design, safety & innovation.

Visit our website at www.cybex-online.com for more information.

Callisto

DESIGN, SAFETY AND FUNCTIONALITY

Design, Safety and Functionality (our D.S.F. Innovation Principle) are at the core of every CYBEX product. The 2017 CYBEX Gold collection lives up to these principles by delivering exceptional design, award-winning safety and innovation, along with tried and tested CYBEX functionality.

Our products regularly undergo a series of strict safety and quality tests, both internally and with third parties, to ensure that they are safe and easy to use. We make it our mission to strive for maximum comfort and convenience for you and your child.

What's more, our products are also analyzed by the most critical of all judges: parents. They are the ones who relentlessly put our products through their paces on a day-to-day basis. Only products that receive their approval can become part of our collection.

SIRONA M2 I-SIZE

FRAME M-LINE STROLLERS

BASE M

Safety, functionality and design are at the core of our innovations at CYBEX. But there's more: to get ready for baby, an infant car seat and stroller are essentials from day one and go wherever you go during the first years of your child's life. With this in mind, we developed the CYBEX Modular System: an efficient package of our M-Line products, which work together to offer parents maximized flexibility. The Aton M infant car seat helps you stay mobile by car. Don't wake a sleeping baby: Simply click the

Aton M onto the Balios M or any of our M-line strollers. What's more, the Aton M shares the Base M with the Sirona M2 i-Size car seat. Once your baby outgrows the Aton M, it's an efficient transition: the seat changes, the Base M stays. The Sirona M2 i-Size clicks into the base and your child travels safely rearward-facing up to 4 years (105 cm). The same smooth transition works for our M-Line travel system: simply exchange the infant's Carry Cot with the seat unit as your baby gets older.

WHY
CYBEX MODULAR
SYSTEM?

/ ONE BASE FOR TWO CAR SEATS

/ ONE SOLUTION FROM BIRTH UP TO 4 YEARS

/ EASY HANDLING

/ ONE-CLICK INSTALLATION

/ INSTALLATION INDICATORS TO PREVENT MISUSE

/ TRAVEL SYSTEM FOR MAXIMUM COMFORT

CYBEX 3-IN-1 TRAVEL SYSTEM

Carry Cot

Car Seat

Comfort Seat

Convenient and stylish to suit the everyday needs of modern parents, M-Line strollers (p. 12) are uniquely designed and include elements to ensure maximum comfort and a great design for navigating the city streets. The CYBEX stroller Balios M is equipped with a 3-in-1 frame, meaning that you can swap the stroller seat for a carry cot or a CYBEX infant car seat (both components are optional additions) to build your ideal travel system.

BASE M

The Base M is compatible with the Aton M (p. 62) and Sirona M2 i-Size (p. 66). Due to the individual adjustable ISOFIX connectors as well as the height adjustable load leg, the two car seats gains extra stability and safety on the Base M. The one-click installation offers a safe and simple installation that requires no further fastening. Installation indicators also help to prevent a possible misuse.

OVERVIEW STROLLERS 30

Whether light and flexible or comfortable and sturdy, our range of strollers and buggies is versatile in style and what they offer. The result is a family of strollers to suit every taste and need and perfectly adapts to the lifestyles of urban parents. With practical functions such as the one-hand folding mechanism, com-

pact sizes and high maneuverability, CYBEX strollers and buggies are ideal companions for city streets. Add on a matching carry cot or a popular CYBEX or gb infant car seat, and you have a practical 3-in-1 system to meet all of your needs.

IRIS M-AIR

IRIS M-AIR

From birth (with carry cot) – 17 kg

ALUMINUM
FRAME

The CYBEX Iris M-Air is the perfect choice for parents looking for a light and flexible city stroller that doesn't make compromises on comfort. The cushioned seat can be used forward or parent-facing. Using one hand, the backrest can be adjusted into three positions, including a comfortable near-flat position.

BALIOS M

From birth (with carry cot) – 17 kg

ALUMINUM
FRAME

The CYBEX Balios M combines comfort and elegance on four robust and durable wheels, meaning it has no problem mastering cobbled streets and curbs. The reversible seat unit can be reclined to a comfortable lying position either forward or parent facing, and you only need one hand to operate most of its functions. These details, among other ingenious design characteristics, make the Balios M the perfect city stroller.

WHY BALIOS M & IRIS M-AIR?

THE WHEELS MAKE THE DIFFERENCE

Both strollers offer the same user-friendly functions and comfort; the main difference between them is the wheels. The Iris M-Air has City Light wheels that are light and maneuverable, smooth to handle on flat pavements and city streets. The city tires are puncture-proof with a narrow tread to make moving around the city easy. The Balios M, with its large and wide wheels, also has puncture-proof tires that are best suited to navigate more bumpy terrain.

Convenient and stylish to suit the everyday needs of modern parents, these strollers are uniquely designed and include elements to ensure maximum comfort. Both the Iris M-Air and the Balios M are equipped with 3-in-1 frames, meaning that you can swap the stroller seat for a carry cot or a CYBEX or gb infant car seat (both components are optional additions) to build your ideal travel system. Simply attach each travel component onto the unit using the available adapters and both strollers can be converted with ease to offer maximum comfort and great design for navigating the city streets.

INSTALLATION VIDEO ON OUR WEBSITE

COMPACT ONE-HAND FOLD MECHANISM

Both the Iris M-Air and Balios M can be folded with the seat unit facing forward or parent-facing. Thanks to the intuitive fold technology, both strollers become small and compact packages in a matter of seconds using just one hand. The strollers stay upright with a self-standing fold and can easily be stowed away.

REVERSIBLE SEAT UNIT

The seat can be used either forward or parent facing and comes with a one-hand reclining function.

BABY CARRIERS & WRAPS

BABY CARRIERS & WRAPS

A close bond

2.GO 50

MY.GO 52

U.GO 53

Physical contact stimulates basic trust and makes a baby feel loved and cared for, aiding its physical and mental development. Discovering the world “at eye level” can help develop a healthy self-confidence for your baby and promote their senses. All CYBEX

baby carriers and slings allow you to establish a close bond to your baby while keeping your hands free. All of our carriers and wraps have been developed in close collaboration with orthopedists and midwives.

WHY CYBEX CARRIERS ?

Physical contact between parent and baby has a lasting effect. That is crucial for both the physical and the emotional development of the child. Our CYBEX carriers allow parents to have both hands free while remaining close to the baby. Additionally, carrying the baby while it sits in a spread-squat position helps support a healthy maturation of the hip joints.

CARRYING YOUR BABY HAS MANY ADVANTAGES FOR YOU AND YOUR CHILD

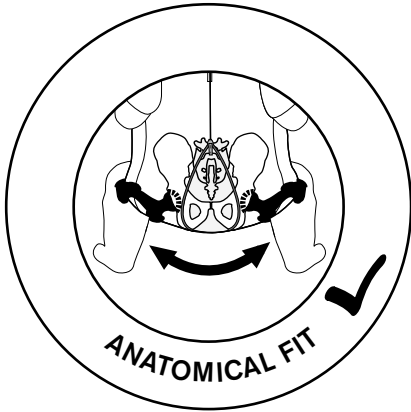

Among other things, carrying your child can:

- Encourage feelings of security and basic trust.
- Promote a healthy physical and emotional development.
- Allow for the development of a strong bond between parent and child.
- Give the parent the flexibility of keeping their hands free.

TUTORIAL VIDEO ON OUR WEBSITE

ERGONOMIC CARRYING POSITION

The parent is not restricted when wearing the carrier, and can move freely while at the same time, the baby gets the physical connection it needs during these early years.

When the baby is carried, the physical contact and connection between parent and baby has a lasting effect. It builds basic trust and makes a baby feel loved and cared for by feeling the heartbeat and warmth of the parent. The spread-squat position the baby adopts inside the carrier is ideal for that physical development as it aids the healthy maturation of the hip joints.

OPTIMAL WEIGHT DISTRIBUTION

The well-padded shoulder straps and extra-wide waist belt provide equal weight distribution away from the shoulders and take strain off the wearer's back.

EXTRA-WIDE BELTS

Extra-wide belts with soft padding put less strain on the wearer's back and ensure optimum carrying comfort.

SPREAD-SQUAT POSITION

The CYBEX baby carriers promote the spread-squat position which is recommended by orthopedists as it can help to support a healthy development of baby's hip joints.

ACCESSORIES

A comfortable and warm full-body wind and weather protector with fleece lining.

2.GO

3.5 – 18 kg (approx. 3 months – 5 years)

The CYBEX 2.GO baby carrier fulfills a baby's natural need for body contact, and is an ideal companion for baby's first years due to its ergonomic shape. Individually adjustable, the 2.GO perfectly adapts to the body of the baby, providing extra comfort for both parent and child.

We make the effort to make our products fashionable and appealing but our principle mission is always to provide your child with maximum safety in the car. To help make sure of this, CYBEX products undergo hundreds of crash tests during the development process. It is no coincidence that each year our infant

car seats consistently achieve outstanding results in the most important European safety and consumer tests. Every new crash test brings about further improvements when we develop our products, and we use the most up-to-date testing technology to ensure this.

WHY ATON 5 ?

HEIGHT-ADJUSTABLE HEADREST

8-position adjustable headrest with integrated harness guide for protection that grows with the child

INTEGRATED XXL SUN CANOPY

Perfect protection against wind and sun with UPF50+

L.S.P. SYSTEM

The Linear Side-impact Protection System absorbs energy in a side-impact collision

EXTRA WIDE Y-HARNESS STRAPS

With soft belt and crotch pads

REMOVABLE SEAT INSERT

For a lie-flat position

ENERGY ABSORBING SHELL

Provides outstanding side-impact protection

LINEAR SIDE-IMPACT PROTECTION

The Linear Side-impact Protection (L.S.P. System) helps absorb the forces of a side-impact collision. The initial force of an accident is transferred through the door-facing extended side protector and is distributed into the car seat's energy absorbing shell. The flexible material and structure of the infant car seat then reduces the forces of impact.

INSTALLATION VIDEO ON OUR WEBSITE

LIE-FLAT POSITION

Working in close collaboration with German doctors and midwives, a function was developed and tested to provide a lie-flat position. Thanks to the removable insert of the seat, the risk of breathing difficulties caused by the head falling forward can be significantly reduced for small and premature babies.

HEIGHT-ADJUSTABLE HEADREST

The harness automatically adjusts in one movement with headrest.

INTEGRATED XXL SUN CANOPY

Serious wind and sun protection with UPF50+.

ENERGY ABSORBING SHELL

Reduces the forces of an impact and channels them away from the baby.

SIRONA M2 i-SIZE

WHY REAR-FACING?

Doctors, accident researchers, as well as consumer and health organizations such as Which?, the ADAC and the German independent consumer testing organisation Stiftung Warentest all recommend to extend the time that children travel rear-facing to 4 years old. The risk of injury has been shown to be much lower for children traveling in rear-facing Group 1 infant car seats. These results have been verified by statistics from countries which primarily use rear-facing seats for older children (i.e. Group 1 seats). This is why we recommend a rear-facing transport for children up to 105 cm (approx. 4 years).

REAR-FACING VS FORWARD-FACING

Unlike adults, the head of a baby is very big and heavy in relation to its body. A baby's head is equal to 25% of its overall body weight, while the neck and spine muscles are not yet fully developed. They need special protection, particularly in case of an accident. In the event of a collision, the CYBEX Sirona M2 i-Size functions like a protective

shield to protect the sensitive neck and vertebrae. The force of impact is distributed evenly over the large surface of the backrest meaning the strain on the neck, shoulders, head and internal organs is significantly reduced. This is why a rear-facing car seat helps to reduce the risk of an injury in a frontal collision.

*Safely rear-facing until your child reaches
105 cm in height*

WHY SIRONA M2 i-SIZE ?

ENERGY REDUCTION TECHNOLOGY

Reduces the strain on the neck in case of a front impact (forward-facing)

GROWING PROTECTION

12-position height-adjustable headrest. Excellent protection for every age

EASY ENTRANCE AND EXIT

Harness clips make moving your child in and out of the seat easy

INTEGRATED L.S.P. SYSTEM

Extendable on side facing the car door

ONE-HAND RECLINE FUNCTION

For optimal sitting and lying positions (5 rear-facing, 3 forward-facing)

CLICK-IN SEAT FITTING SYSTEM

Enables an easy change between the rear-facing and the forward facing position

REAR-FACING

Birth – 105 cm (up to 19 kg, approx. 4 years) optional forward facing (starting from 76 cm, min. 16 months)

ECE R-129 (i-SIZE)

The CYBEX Sirona M2 i-Size complies with the 'i-Size' European requirements and regulations for car seats. The i-Size regulations state that children aged 15 months and under must travel in a rear-facing car seat.

At CYBEX we recommend prolonging the time that children travel in a rear-facing position in the Sirona M2 i-Size until they are around 105 cm in height (approx. 4 years). The Sirona M2 i-Size can also be used in cars which do not comply with i-Size. Please see the compatibility list on the CYBEX website.

INSTALLATION VIDEO ON OUR WEBSITE

**INTEGRATED L.S.P.
SYSTEM**

For maximum safety in case of a side-impact collision.

**ONE-HAND RECLINE
FUNCTION**

Adjustable with one hand (rear-facing: 5 positions; forward-facing: 3 positions).

**HEIGHT ADJUSTABLE
HEADREST**

12-position height adjustable headrest with integrated harness guides that grow with your child.

REAR-FACING AND FORWARD-FACING TRANSPORT

The new Sirona M2 i-Size allows you to transport babies rear-facing from birth up to a height of 105 cm (approx. 4 years). Children can also be transported forward-facing once they are older than 15 months and reach a height of 76 cm.

NEW

JUNO M-FIX

JUNO M-FIX

9 – 18 kg (approx. 9 months – 4 years) ECE R44/04

The Juno M-Fix is a new member our award-winning line of CYBEX Gold car seats Group 1. It has an impact shield that can be adjusted using one hand, and an individually adjustable Linear Side-impact Protection System (L.S.P. System Plus) in case of a side-impact collision. The 8-position headrest can be adjusted to suit the height of your child, and the clever air circulation system helps to keep your child cool in increased temperatures.

WHY JUNO M-FIX?

ADJUSTABLE IMPACT SHIELD

The impact shield (patent pending) works similar to an airbag, significantly reducing the force of impact by distributing it evenly over energy-absorbing materials. Your child's sensitive neck, head and chest area are also well protected thanks to the adjustable impact shield. It adjusts using one hand to fit your child's body and offers more freedom of movement for the upper body compared to conventional impact shield car seats.

INSTALLATION VIDEO ON OUR WEBSITE

RECLINING BACKREST

Thanks to the recline function the car seat can be better adjusted to the vehicle seat.

ISOFIX CONNECT

Provides added stability and safety and can also be used in vehicles without ISOFIX.

AIR CIRCULATION SYSTEM

The integrated air circulation system helps regulate your child's body temperature, even on hot days.

HEIGHT ADJUSTABLE HEADREST

The height adjustable headrest of the seat grows with your child for a more perfect fit and maximum safety throughout the whole period of use.

L.S.P. SYSTEM

In case of an accident, the force of a side-impact collision is systematically absorbed and the child's head is actively guided into a safe position.

PALLAS M-FIX

PALLAS M-FIX

PALLAS M-FIX

TEST WINNER GR. 1/2/3

9–36 kg (approx. 9 months – 12 years) ECE R-44/04

The 2-in-1 seat was the test winner in Group 1/2/3 of the 06/2015 tests conducted by German Stiftung Warentest. The Pallas M-fix grows with your child and therefore offers excellent safety up to 11 years. In Group 1, Pallas M-fix and its adjustable impact shield protects against neck injuries without being restrictive. For children from 15 kg (approx. 3 years and above) the seat can be easily converted into a Solution M-fix and it can also be used in cars without ISOFIX thanks to the flexible connectors.

PALLAS M

9–36 kg (approx. 9 months – 12 years) ECE R-44/04

Pallas M offers optimized safety and comfort with a lifespan of up to 11 years. The 2-in-1 seat can be used in a vehicle with a 3-point harness belt. As a Group 1 seat, the Pallas M features an adjustable impact shield. In case of a frontal collision, the force of the impact is distributed across the entire surface of the impact shield, similar to an inflated airbag. As a Group 2/3 seat, the Pallas M can be easily converted into a Solution M once the child reaches 15 kg (approx. 3 years).

WHY PALLAS M/PALLAS M-FIX?

PATENTED RECLINING HEADREST
Can prevent the child's head from falling forwards while asleep

INDIVIDUALLY ADJUSTABLE LINEAR SIDE-IMPACT PROTECTION
L.S.P. System

2-IN-1 SEAT
Can be converted into the Solution M or Solution M-fix

ADJUSTABLE IMPACT SHIELD
Adjustable with one hand (only Gr. 1)

ISOFIX CONNECT (ONLY PALLAS M-FIX)
For extra stability and safety. Can also be used in vehicles without ISOFIX

COMFORTABLE, ONE-HAND RECLINE FUNCTION
Can be easily adjusted to a sleeping position with just one hand (Group 1)

2-IN-1 SEAT

For children starting from 15 kg (approx. 3 years) the Pallas M (-fix) can be easily converted into a Group 2/3 seat Solution M (-fix) in just a few simple steps. The Pallas M series grows with the child and provides optimal safety and a lifespan of up to 11 years.

INSTALLATION VIDEO ON OUR WEBSITE

PATENTED RECLINING HEADREST

The CYBEX patented 3-position reclining headrest shifts the balance point of the child's head slightly back and helps prevent the head from falling forwards when the child is asleep. In case of a side-impact collision, the child's head remains within the safety zone of the seat, ensuring maximum protection.

COMFORTABLE RECLINE FUNCTION

Due to a comfortable recline function, the seat can be easily adjusted with just one hand for a relaxed journey (Group 1 only).

SECURE WITH IMPACT SHIELD

Similar to an inflated airbag, the forces of a collision are distributed across the entire surface of the impact shield, protecting the child's sensitive head, neck and shoulder areas. The adjustable impact shield offers comfort without confinement (patent pending) and an optimized belt routing increases safety and makes installation easier.

L.S.P. SYSTEM

The force of a side-impact collision is systematically reduced by individually adjustable side protectors, as well as, by the shoulder and head protectors. At the same time, the body's kinetic energy caused by the impact is absorbed right away and the head is actively guided into a safe position.

SOLUTION M-FIX

TEST WINNER GR. 2/3*

15–36 kg (approx. 3–12 years) ECE R-44/04

The Solution M-fix was the test winner in Group 2/3 in the 06/2015 test conducted by German Stiftung Warentest (*on par with one product from a different manufacturer). The newest member of the popular Solution series stands out through its range of innovative safety and comfort functions such as the patented reclining headrest, the individually adjustable Linear Side-impact Protection system (L.S.P. System), the 12-position height-adjustable headrest and the air ventilation system.
