CYBEX PRIAM

INDIVIDUALISED
MOBILITY

The requirements of a stroller and travel system are as diverse as life itself. Because when you're out and about with children, things don't always go according to plan. The PRIAM is an ideal companion because it meets all requirements right from the start. Whether baby or infant, Light or Lux version, you'll find the right attachment for every age and every need. Regardless of which choice you make – or if the choice changes – everything will still fit on the lightweight, classic frame (available in chrome or black). The CYBEX travel system is also fully compatible with CYBEX infant car seats such as the Aton Q, Aton Q i-Size and Cloud Q.

There is also a choice of wheels for every path: Light Wheels for smooth asphalt, All Terrain Wheels for bumpy cobbles, and, as a hybrid solution, Trekking Wheels for both the city and the countryside. The PRIAM also provides a ski attachment for snow and ice and a Kid Board for siblings, both available as additional accessories. Parents of young children have enough to think about – luckily the PRIAM system offers a simple and practical solution to give peace of mind.

MIOS COT

CYBEX MIOS

THE NEW LIGHTNESS

A new tribute to the innovative life's work of Charles and Ray Eames, the MIOS supports their motto: Design should not only have functionality, it must also be fun! This little brother of the PRIAM provides maximum stability in a lightweight frame, offering an airy, floating appearance. The retro-modern seat design features breathable mesh to not only support the »lightweight« aspect, but also help to regulate the child's body temperature. The narrow design glides through the urban bustle with ease. Compact, flexible, functional, and stylish – ideally suited to the needs of modern parents.

YEMA

A familiar voice, cosy warmth and that unique smell – a baby carrier intensifies that important bond between parent and child from birth. »Babywearing« nurtures a deep sense of trust between parent and infant, while stimulating the child's cognitive development. The correct carrying method places the infant in the healthy spread-squat position, helping the joints to develop. A baby carrier provides you with almost unlimited mobility: while your baby is in a snug and safe place, your hands are free to deal with the challenges of fast, urban life. The YEMA is now available in 2 versions: YEMA TIE for easy individual adjustment and YEMA CLICK for fast click-on & click-off - perfectly fitting to your personal needs.

CARRY POSITIONS

From newborn to toddler (approx. 3.5 - 15 kg)
with three carrying positions: in front, on the side or on the back

YEMA CLICK

FRONT
CARRYING

Babies can be carried facing the chest from birth. The baby carrier encourages the correct posture in the spread-squat position, which can help the hip joints to develop correctly.

HIP
CARRYING

Babies that can hold their own head (from around 3-4 months) can also be carried in the side position. This allows them to rest against mum's shoulder while taking in their surroundings.

KOI FASHION COLLECTION

Crystallized. Calmness. Strength and happiness. The new CYBEX Fashion Collection KOI blends the symbolism of the enigmatic underwater creature of Japanese mythology with state-of-the-art technology, materials and tailoring. Just like the underwater jewel itself, modern and fashion-conscious parents can go with the flow of the metropolis thanks to CYBEX »KOI«. Premium appliqués and embroidery on a unique reflecting, crystal-silver material, harmonise perfectly with all major Prêt-à-Porter lines. The new PRIAM, MIOS, Cloud Q, YEMA TIE and matching accessories bring this colourful aquatic animal to life, while helping little ones drift off into fanciful dreams.

CYBEX x ANNA K

The sweeping expanse of the universe, where stars, planets and galaxies move beyond space and time in an everlasting dance with gravity was fashion's new shooting star Anna K's inspiration for her SPACE ROCKET collection for CYBEX. The interaction between softness and power, cocooning and exploring is reflected in the new editions of MIOS, PRIAM, YEMA TIE and CLOUD Q – intergalactic space capsules for little urban star hunters. Every walk turns into an individual orbit for metropolitans.

The countdown is on. Bon Voyage!

LIVING YOUR MOST FABULOUS DREAM

For the first time, CYBEX is connecting with the world of interior design. With the launch of a furniture line and a colourful accessory line that includes a highchair, everything is redesigned to fit seamlessly into the parents' lifestyle. Leading this exciting collection is the internationally celebrated product and interior designer, Moooi owner, and industry rebel Marcel Wanders. The »Parent's Collection« is sophisticated yet playful, allowing parents to continue their cultivated lives – even with little ones in tow. To go one step further, the new range also lets mums and dads pass on their creativity to the next generation through design-forward furniture that smoothly integrates, creating a dream environment in the home.

HIGHCHAIR

BY MARCEL WANDERS

Make every meal memorable with our iconic wooden highchair, exquisitely designed for comfort and style. Suitable from 6 months up to 3 years (15 kg), the chair is easily adaptable and features a removable snack and play tray, a harness system, safety bar and the footrest can be adjusted to the preferred height so your little one will always be comfortable. This outstanding highchair is made from a beech wood frame, chrome-plated steel parts along with an ergonomic, durable plastic seat shell which supports a luxurious cushion that is lavishly embroidered and attached on the back with an iconic flower screw. Who knew mealtimes could be so stylish?

BOUNCER

BY MARCEL WANDERS

This chic bouncer is the perfect multi-tasker, great for bouncing, playing or drifting off to sleep. Suitable from birth up to 15 kg (approx. 3 years), it has the distinctive appearance of this global designer, and is made using top quality materials, chrome-plated steel parts and beech wood. It isn't just a style piece though, the bouncer is practical too. With a 3-point harness attachment, your little one can bounce independently and safely, plus you can adjust it to two positions. To top it off, the iconic flower screw makes the collection a stylish must-have for any home. The sun canopy accessory is perfect for days of bouncing fun outside on the terrace.

ROCKER

BY MARCEL WANDERS

Enjoy moments of bliss with your child as they relax in the Rocker. The baby rocker, featuring a swing function, is Marcel Wanders' modern interpretation of the classic rocking chair. Suitable from birth to a weight of 15kg (about 3 years) the Rocker is made from high-quality materials such as decorative beech wood and a classy chrome-plated steel frame. The elaborately embroidered cushion, coupled with the iconic flower-shaped screw on the back, is not only a calm oasis for the kids, but also a real design object for the home. What is more, the 3-point harness and the anti-slip feature ensure that the child can safely swing in the house or, on a warm day, on the terrace.

SOLUTION Q3-FIX

Gr. 2/3, 15 – 36 kg (approx. 3 to 12 years)

3-POSITION RECLINING HEADREST

The CYBEX patented 3-position reclining headrest shifts the balance point of the child's head slightly back and prevents the head from falling forward when the child is asleep. In the event of a side-impact collision, the child's

head remains within the safety zone of the seat, ensuring maximum protection. The patented head protection ensures a more comfortable sleeping position and enhanced safety compared to conventional systems.
